Notification about Supply of USB Flash Drive Ending

Introduction

The supply of USB flash drives included as a standard accessory will gradually be ended, starting with machines shipped from December 2022 onward. Thank you for your understanding.

Background

Until around 2017, machine backup data was saved on a USB flash drive. At present, when backup data is required, it may be provided by a DISCO customer engineer, so backup data is not saved to a standard-accessory USB flash drive.

Applicable models

All the models

USB port specification and USB flash drive for which operation has been verified

Connector type	USB type A connector (receptacle)
Electrical/mechanical specification	USB Rev.2.0 compliant
Transfer rate	480 Mbps (maximum)
Supported USB devices	USB Mass Storage Class compliant flash memory
Number of ports	1
USB flash drive for which operation has been verified	Manufacturer: HAGIWARA Solutions Co., Ltd. Model: UBB2-016G0

Information to keep in mind

Do not use a USB flash drive which is equipped with security functions. If a USB flash drive with security functions is connected to a machine, there is a risk that it could cause machine problems. Customers who wish to use a USB flash drive for which operation has already been verified by DISCO should select it as an optional accessory.

Inquiries

Please contact your local DISCO sales representative or DISCO customer engineer if you have any questions regarding this matter.
